

## 130 Wakely Electric Mill

- **Highest quality precision balanced solid chilled rollers**
- **Working surfaces are 50 - 54 rockwell**
- **Output 950kgs**
- **38mm Bearings**
- **Roll gap adjustment**
- **No metal to metal contact between rollers**
- **Ideal for crushing Oats, Barley & Wheat**
- **Electric drive 1- 2.2kw Motor**

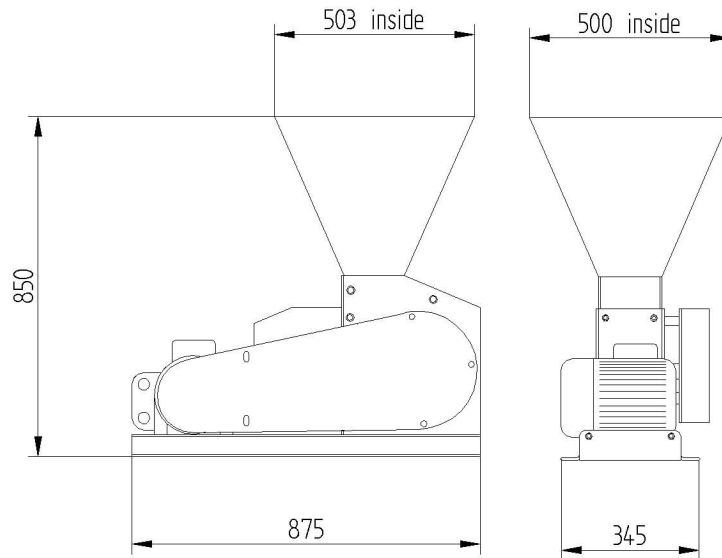

### The Wakely Mill

Synonymous with durability for over 25 years all our mills feature Solid chilled Rolls. The rolls are solid chilled, made by the centrifugal casting process and use a double pour technique. They cannot be compared with mild or hardened steel rolls and with annual maintenance, chilled rolls last indefinitely. The rolls are balanced to a degree that vibration is almost eliminated and with the inclusion of sound deadening pads leads to any extremely low noise, low vibration machine, thus extending mill life and improving the working environment

**Option available:**  
**Electric drive 2 - 2.2kw motors**  
**Output 1500kgs per hour**

**WAKELY ENGINEERING LIMITED, ESSEXFORD, LOUTH, DUNDALK, CO. LOUTH, IRELAND**

### **The Wakely 130**

**The Main Motor is controlled by a proximity switch. This safety feature shuts down the Motors when the hopper is empty of grain.**

**User friendly - Simple feed control flap.**

## **WAKELY DRY ROLLER/MILLS - THE YELLOW ONES THAT EVERYONE IS TALKING ABOUT!**

### UNIQUE WAKELY FEATURES:

- Precision balanced chill hardened SOLID rollers - Working surfaces are 50-54 Rockwell hardness - Heavy duty 55mm ball bearings
- Smooth running LOW NOISE efficient rollers with no roller to roller contact
